Re: Reclaim Water Alternating Irrigation Schedule Update

Dear Member:

Due to the increasing irrigation demand in Ashley Plantation and Stonechase Subdivisions, Pace Water System is continuing the odd and even watering schedule that began last May. Approximately midmorning each day, the lines serving each subdivision will be manually controlled by PWS. On odd calendar days the service to Stonechase Subdivision will be turned off. On even calendar days the service to Ashley Plantation will be turned off. Residents are asked to adjust their irrigation controllers as necessary to obtain the best operating pressure and spread the usage throughout the day.

As many of you have noticed from the stockpile of purple pipe and materials located at 5-Points, construction is well underway on the new reclaim water line going out Quintette Road. Construction is scheduled to be completed by end of the summer.

PWS would like to apologize to its members for the inconvenience and hope to have this issue resolved upon completion of this project. If you have any questions or need additional information please feel free to contact Shawn Mistovich or myself at (850) 994-5129.

Sincerely,
Pace Water System, Inc.
